WHERE

We live in a safe community. Most communities and venues that have had an active assailant event were safe until the event occurred. You never know where or when an event will occur. This training is meant to provide a level of training and awareness of how to respond during a situation you never thought you would be in. Hopefully, those who attend will never need to use the training they receive. This is a free and open event for the City of Oconomowoc and surrounding area.
